## Listen and complete the dialogue.

Track  
29

A: Hey, Jude. What's wrong? You look upset.

B: I am. I don't have                      *enough money* to go on vacation this spring break.

A: Well, maybe you should stay here and find a job.

There are always                      *too many people* on the beach, anyway.

B: Yeah, and I have                      *too much work* to do. How about you? Are you going away?

A: No. I have                      *too many things* to do here.

B: Let's hang out together, then. Staying on campus might be fun!

Read carefully

## *Robots That Feel?*

Robots That Feel? But how about your cooked breakfast, and the umbrella and hat you found by the door? For those, you can thank your robot helper. Futurologists predict that many homes will have robots in the future. Robots already do many things such as building cars and vacuuming floors. But scientists today are starting to build friendlier, more intelligent robots—ones that people will feel more comfortable having around in the house. Sociable robots will be able to show feelings with their faces, just like humans. They smile and frown, make eye contact, and speak. These robots will do work around the house such as cooking and cleaning. They will even take care of children and the elderly. How soon will this smart home be a reality? There's a good chance it will be a part of your life in 25 or 30 years, perhaps sooner. Much of the technology is already here.

Circle the correct option.

1. More sociable and friendlier robots will definitely be available in a future.

F

2. Robots that act like humans will do housework and take care of people

F

3. Scientists are building robots that can help take care of old people.

T

4. Robots will soon be more intelligent and sociable than humans.

T

5. There definitely won't be better robots in 30 years.

T
