

# GEOMETRÍA

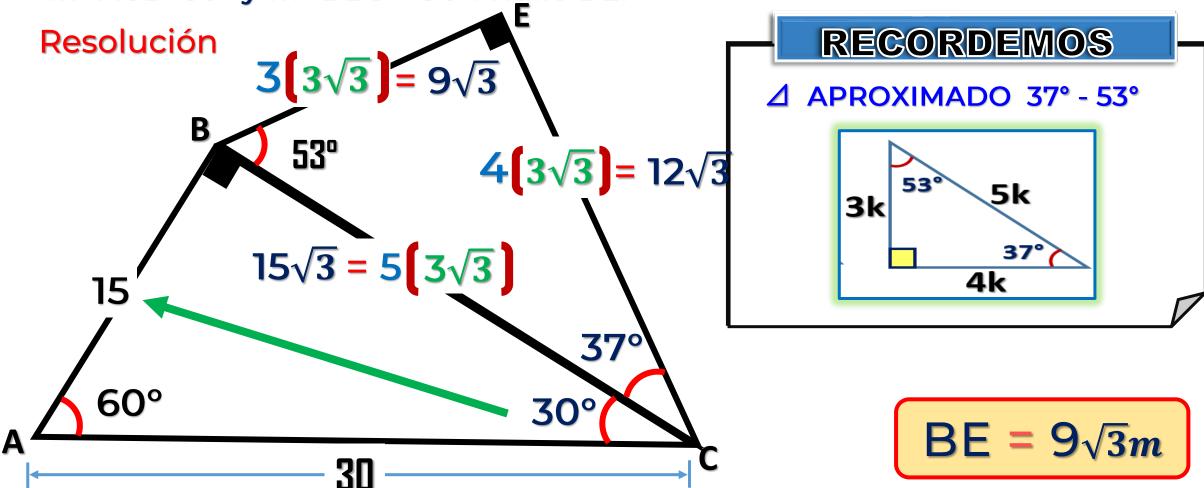

Asesoria

2n SECONDARY d Tomo 4

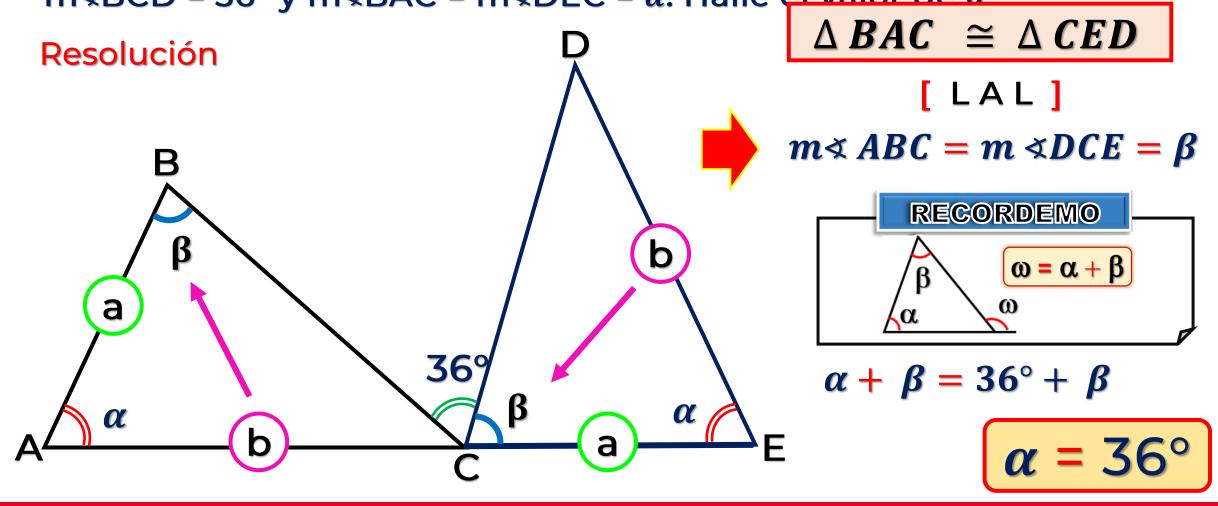

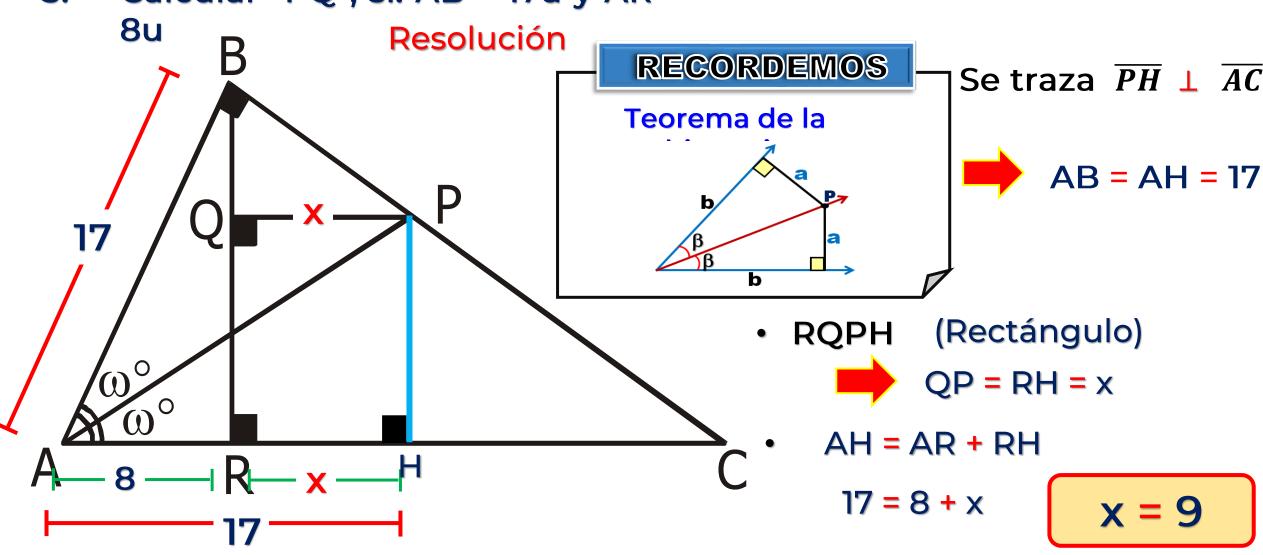

2. En un triángulo ABC, se prolonga  $\overline{AC}$  hasta E, luego se ubica un punto D exterior relativo a  $\overline{BC}$ , tal que AB = CE = a, AC = DE = b, m $\not ABCD = 36^\circ$  y m $\not ABAC = m\not ADEC = \alpha$ . Halle el valor de  $\alpha$ 

3. Calcular "PQ", si: AB = 17u y AR =

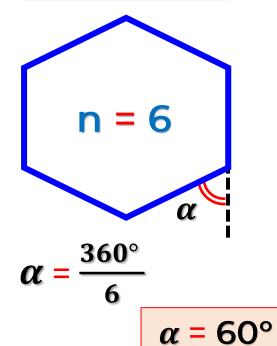

4. Calcule el valor de x, si los polígonos mostrados son polígonos regulares.

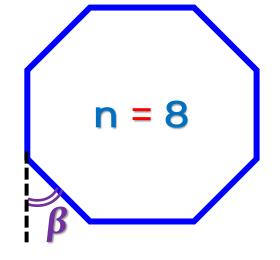

Medida de un ángulo externo

m∢e = 
$$\frac{360^{\circ}}{n}$$

# **HEXÁGONO**

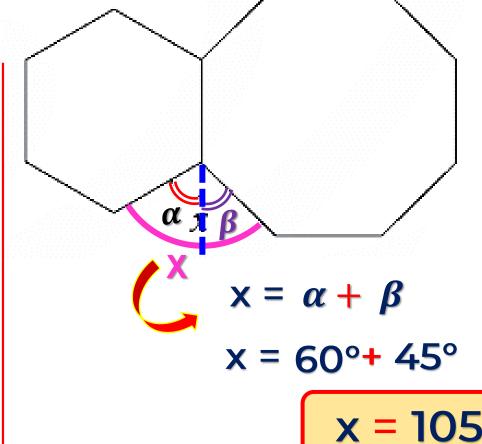

# **OCTÁGONO**

$$\beta = \frac{360^{\circ}}{8}$$

$$\beta = 45^{\circ}$$

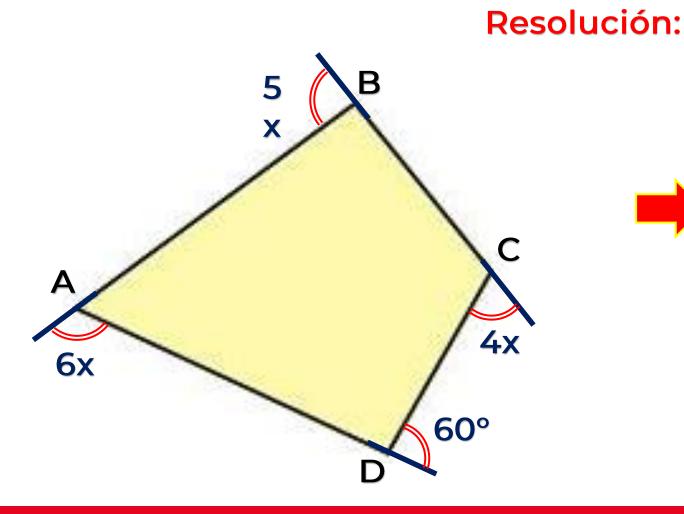

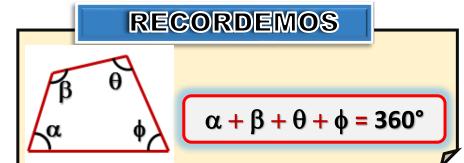

$$x = 105^{\circ}$$

5. Las medidas de los ángulos externos de un trapezoide son 4x, 5x, 6x y 60°. Halle el valor de x.

$$6x + 5x + 4x + 60^{\circ} = 360^{\circ}$$

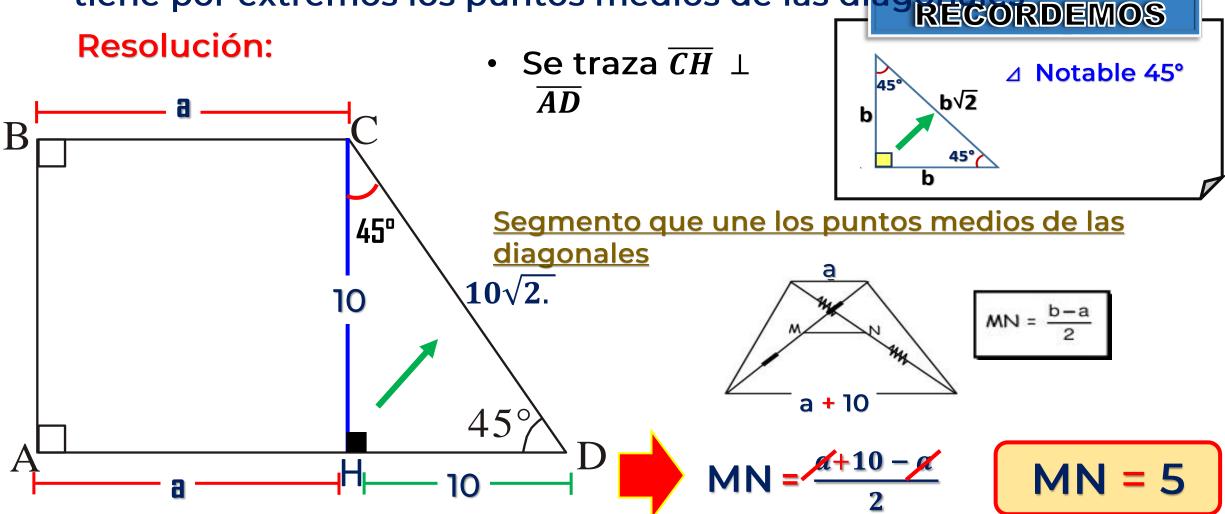

$$15x + 60^{\circ} = 360^{\circ}$$

$$15x = 300^{\circ}$$

$$x = 20^{\circ}$$

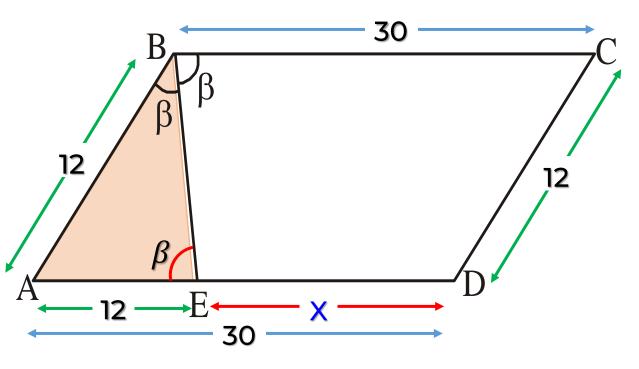

6. En la figura CD =  $10\sqrt{2}$ . Calcule la longitud del segmento que tiene por extremos los puntos medios de las diagonales.

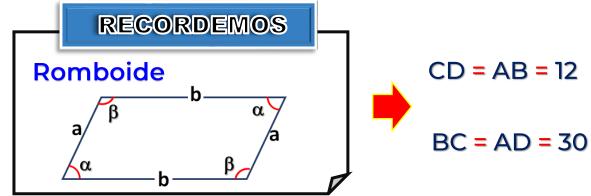

7. En la figura ABCD es un romboide, BC= 30 cm, CD= 12cm. Calcule la longitud de ED.

## Resolución:

- BC // AD (Áng. Alternos Internos)
  m∢CBE = m∢BEA = β
- El  $\triangle$  BAE: (Isósceles)  $\Rightarrow$  AB = AE = 12
- <u>En AD</u>: AD = AE + ED

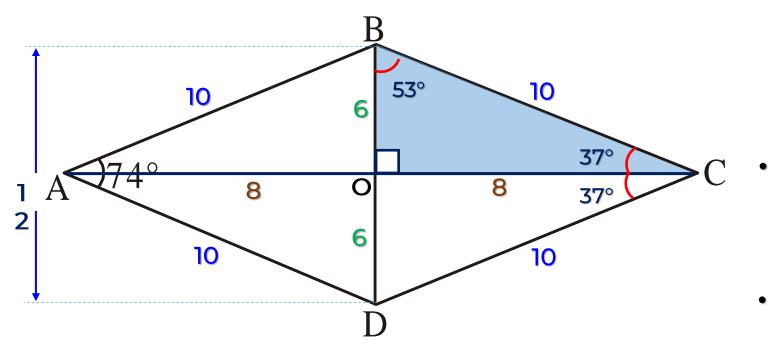

$$30 = x + 12$$

$$x = 8 cm$$

8. En la figura ABCD es una rombo, BD = 12 cm. Halle su

perímetro Resolución:

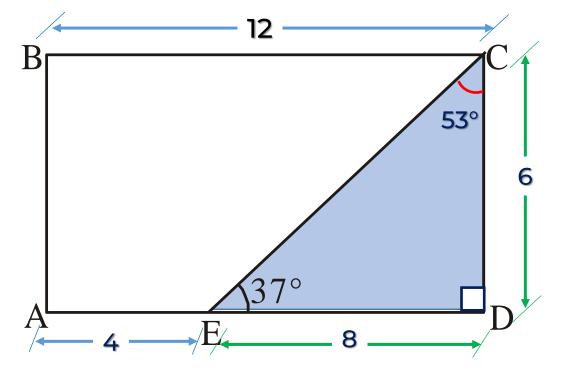

En el rombo: (Se traza  $\overline{AC}$ )

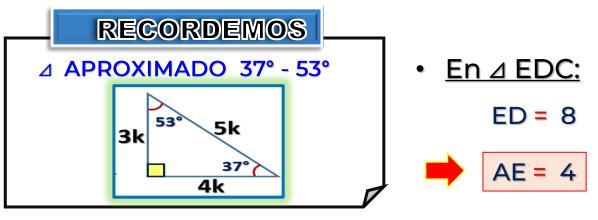

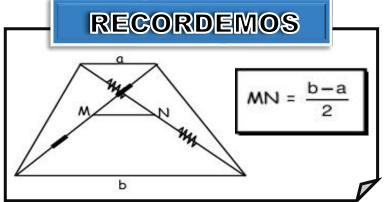

9. En la figura ABCD es un rectángulo. Calcule la longitud del segmento que tiene por extremos los puntos medios de las diagonales del

### Resolución:

trapecio ABCE. CD= 6, BC= 12

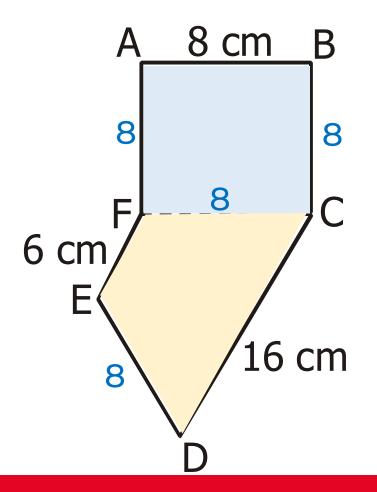

$$MN = \frac{12-4}{2}$$

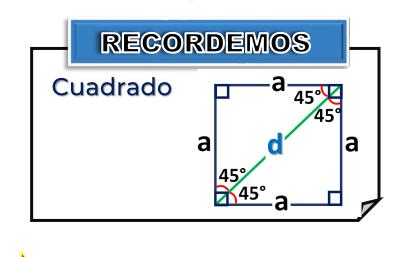

$$MN = 4$$

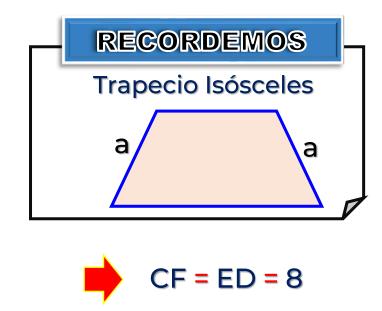

10. Hallar el perímetro del hexágono no convexo ABCDEF, si ABCF es un cuadrado y EFCD un trapecio isósceles

## Resolución:

El perímetro del hexágono no convexo ABCDEF

$$2p = 8 + 8 + 16 + 8 + 6 + 8$$

2p = 54 cm
